ER Diagram Sample Questions

The following are questions for [database](#) management design.Create and submit an ER Diagram assignment help with at least two tables and their attributes. Your diagram should include:
Table Names (for each entity)
Attributes (first name, last name, city, etc.)
Primary Keys
Foreign keys
Relationships
Field types (text, currency, numeric, date)
Your tables should be normalized (first, second and third normal forms)
You can use the attached form or upload your tables in Excel or create and link them in an Access database file.
For information on how to use Word to create an ERD, go [to](#)
